## **About Rethen Foundation**

Rethen Foundation has created a new innovation, a modern crypto currency wallet that is used to protect your assets, we have also been supported on the Blockchain network, Ethereum and several other networks.

We have very good features for crypto currency wallets in the future. Among them is that we can develop the security level of your wallet using modern security protect which cannot be hacked by irresponsible people. Speed up transactions between crypto wallets. , Using modern data storage, can be accessed anywhere you are and certainly minimizes the risk that you don't want.

With the rapid development of crypto currencies or digital payment devices in the world, which are used for future payment instruments. We will create a modern crypto currency wallet with features that support everyone to feel safe and comfortable in crypto currency transactions in the future.

## **Abstract**

A Future modern cryptocurrency wallet has very high security and a review of any crypto related projects, such terms are defined by a group of ordinary crypto fans, without the possibility of paying to buy a token that will be made as a fee in the wallet modern crypto currencies in the future. Rethen tokens are also suggestions for all crypto players to invest.

# Visions Statement

Rethen Foundation has a vision, which is to develop a wallet of crypto currencies and new innovations in the world of crypto currency trading. Where we have created modern crypto currency wallets that have high security protection features, are globally accessible and easy to use, so you don't have to be afraid if you store a lot of assets in your wallet, because we already provide modern data storage and high security which protects to minimize the risk that occurs, you can also access it and use it for transactions in crypto currency and of course using Rethen tokens.

# Problem Statement

## *1. Poor Wallet Security*

Many people who make money that have a very bad reputation, can be hacked by irresponsible parties, and many investors in the world of currency trading to be the best. bad, we here provide digital money that has been equipped with some great features in the future.

## *2. Easy to be hacked by irresponsible people*

In this problem there are so many found in the world of crypto trading, where you have the Crypto wallet suddenly your assets are sent by yourself without your knowledge, that's where the Crypto wallet you use lacks a high level of security so it's easy to crack, relax, don't panic , here we will change all that by launching Modern Cryptocurrency wallet which has been equipped with various interesting features

## *3. Customer Service*

In this section sometimes makes people feel annoyed and frustrated because many customer service seldom serve well, Rethen Foundation will try to be the best in the future, serve Investors with Friendly and kind, respond quickly when receiving complaints from investors and surely it will develop better.

## **Feature From Rethen token**

### **1. *Modern Security Protect***

Modern security that is used to protect your Rethen wallet, don't worry we have used a modern security engine where when you access Rethen your wallet will be asked to enter the pin that you entered when creating this Rethen wallet, not easily hacked like other wallets and minimize the risks that occur.

### **2. *Can be accessed globally***

It is not difficult to use this Rethen wallet, if you are not in the house or again outside the house, you can access it via Rethen App. Have a pretty good appearance, easy to use and global in the sense that it can be accessed from every corner of the world.

### **3. *Fee in Transaction***

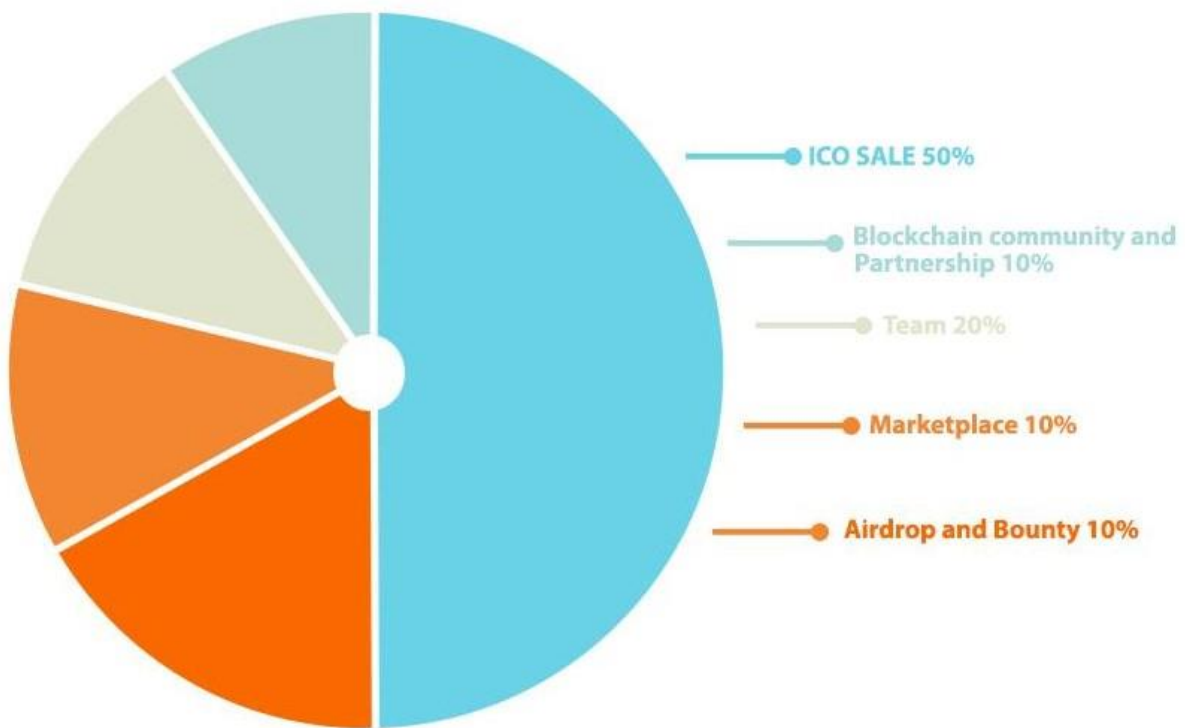

In the transaction using Rethen Wallet, you are charged a very small fee, and allows not to harm you to the users, have a good speed in sending tokens or coins. Rethen wallet has also been supported by the Blockchain Network, Ethereum and several other networks that will collaborate with Rethen Foundation.

## **Risk and Disclaimer**

Like most crypto industries in general, the risks are high and do not have to be understood. Below is a complete list of some of the risks borne by this particular project:

- First and foremost, there is a high risk of volatility in token and value-loss prices. There is a very real possibility that buying Rethen tokens on the exchange will result in the buyer losing his money. There are no team members who are financially, or anywhere. in Rethen tokens are suggestions for investment for the community
- The business model outlined in this white paper is not without error. Always there and always there will be a level or risk of manipulation. There is almost no perfect life, cannot be solved, cannot be solved or cannot be exploited in several ways. There is always a small chance that reviews or ratings are tainted by a conflict of interest or a bad actor. Safeguards will be added and modified as we will learn to be better
